Pauite Trailer 1650 S. 550 W. Salina, Utah

“The Black Widow Groomer is a premium ground working implement: That is easy operated and produces a superior footing for your equine training or events.”

“The patent pending design allows the Black Widow Groomer to level the ground without interference from the tractor bouncing over rough terrain. And with enough weight, the machine can rip up hard-packed ground and repack it to your desired footing needs.”

NLBRA Selects Black Widow as Official Groomer of NLBFR

By Kimber Solberg, Executive Director

The Official Groomer of the National Little Britches Finals Rodeo is the Black Widow Groomer. This implement equipment is easy to operate and produces superior footing for rodeo events. The Black Widow Groomer made its debut at the National Finals Rodeo in 2009 and was found to be a superior to implement devices used in prior years. The NLBRA is proud to partner with Black Widow ensuring that the ground is well maintained in all three competition arenas.

The patent pending design allows the Black Widow Groomer to level the ground without interference from the tractor. The device has enough weight and can rip up hard-packed ground and repack it to the desired footing.
